FOR IMMEDIATE RELEASE

Recursion Software, Inc. wins Titan Fast 50 Award For the Second Year

Recognized as one of the fastest growing companies in the Dallas/Fort Worth area

DALLAS, TX (August 22, 2005) – Recursion Software, Inc. is one of the fastest growing high tech companies in the Dallas-Fort Worth area, according to the Metroplex Technology Business Council (MTBC) of Richardson, Texas. Recursion Software, Inc. received the prestigious Titan Fast 50 Award for 2005 at the annual Tech Titans Awards Gala on August 19, 2005 at the Eisemann Center in Richardson, Texas.

“We are pleased to be recognized, for the second year in a row, as an innovative leader in the software industry with consistent year over year revenue growth”, said Paul Lipari, President and CEO of Recursion Software, Inc. “Enterprises use our proven application development platforms and tools to meet the demands of their internal customers for today’s most sought after applications solutions including mobility, grid computing and web services. Our software engineer’s pride themselves on providing outstanding customer service. We are honored to be recognized by the DFW technical community for our efforts to provide applications developers with platforms and tools they can use today and that will carry them into the future.”

Recursion Software, Inc. has been delivering best in class applications development and integration platforms as well as software development tools since 2001. Our application integration platforms include the award winning Voyager® Development Platform for Distributed Java™ applications. Voyager is the solution for today’s distributed Java applications particularly mobile applications. The Voyager development framework makes it easy for software developers to create mobile applications that can withstand network and hardware failures.

Cinergi™ is our multi-language application integration platform or Enterprise Service Bus. Cinergi enables enterprises to efficiently re-purpose application code written in a variety of languages in new applications regardless of what language the new application is written in. Cinergi preserves an enterprise’s investment in applications they have already written while allowing them to take advantage of competitive business logic in new applications.

Recursion Software, Inc also offers a complete suite of software development tools that provide pre-written software code for Java, C++ and .NET applications. Our suite of

software development tools save time and money freeing software developers and architects to focus on higher level application design and development activities.

The Tech Titan Fast 50 award recognizes the fifty fastest growing technology companies in the Dallas/Fort Worth area. Participants are either public or private companies. Contenders must have developed innovative, proprietary technology and are from a variety of areas including communications, computers, peripherals, Internet, life sciences, semi-conductors and software. This award is based on the percentage of revenue growth over either a one or a five-year period.
