Recursion Software Names Bob DeAnna as New Chief Technology Officer

-- New CTO brings software industry leadership in distributed application frameworks. --

FRISCO, Texas (April 25, 2006) - Recursion Software, Inc., a global provider of software development solutions, today announced that Bob DeAnna has joined the company as Chief Technology Officer. DeAnna brings with him 22 years of experience in the software industry, with extensive expertise in distributed application frameworks. Recursion Software enables intelligent applications on a wide range of devices through a software platform for peer-to-peer and/or peer-to-enterprise heterogeneous environments, tools for intelligently collecting, analyzing and distributing data, and components and solutions for markets operating in a distributed knowledge network.

“Bob’s experience with distributed application frameworks combined with his industry expertise in healthcare, insurance, telecommunications and finance are great additions to Recursion Software, and complements our product strategy and corporate vision,” said Paul Lipari, president and CEO, Recursion Software, Inc. “Since joining Recursion Software late last year, he has had a positive impact on our vision of becoming the standard platform for mobile, intelligent, collaborative edge to edge and enterprise applications.” We look forward to leveraging Deanna’s industry expertise as we continue to extend our product lines to better address the growing need for efficient, easy to use software development platforms. ”

DeAnna comes to Recursion Software from Bloomberg Financial in New York, N.Y., where he served as senior software architect and engineer responsible for leading a team through the architecture, design and development of a variety of distributed computing applications for Bloomberg Law. Prior to joining Bloomberg, DeAnna held a number of roles ranging from vice president to architect with companies including Verizon, AT&T, Swiss Re-Insurance, State Farm Insurance, 3M Health Information Systems, Merant Software and Zeosoft. DeAnna holds a BS in Mechanical Engineering from Rutgers University and a continuing education degree in C/C++ and Unix Programming from New York University.

About Recursion Software, Inc.

Founded in 2001, Recursion Software, Inc. provides software engineers with powerful enterprise development solutions for constructing distributed systems using proven Java™-based methods and
